Qualitative

What was the main reason you enrolled in this course? (Select up to 2) - other (please specify)

- Other (please specify) I had to take algebra in order to get up to calculus.

What did you like about this course? -

- I liked that it was very organized, and he posted the notes for us after class. He printed out word problems for us so that we didn't have to write all of the words down. He also made sure everyone understood everything before he moved on.
- I enjoyed that the coursework because there was enough work for me to get enough practice but not so much that I was too overwhelmed. The professor was also very knowledgeable, understanding, and kind. He was also very good at communicating to us if due dates changed, class was cancelled, etc. Also, I liked using Pearson because I could get extra practice if I wanted to and there were videos to re-teach material if I forgot it. Finally, he encouraged us to ask questions and gave us enough time to copy down notes.
- The course material.
- I like that the professor was really nice and he took time to carefully explain anything you find difficult in class.
- The instructor explains everything very well to everyone's understanding.
- While MML is great for homework or studying the online text book can not be resold
- I wasn't good at algebra in high school. This course made it more simplified for me.
- Pacing and amount of time to complete assignments within the course.

What could be improved about this course? -

- N/A
- n/a
- MML for homework/test only
- Extra credits should be given and the time duration for the exams should be extended.
- Its good as it is.
- The course needs no improvement.
- The only thing I would say is make it more engaging by asking questions during the class.
- I was very pleased with this course, and I don't think anything could be improved.

Please explain your answer to the question above. Why would you recommend or not recommend this course to others? -

- I would recommend this course because Professor Cohen is a great professor. Even though it was his first year as a professor, he knew what he was talking about. He always asked if we had questions, and he left the notes up until everyone was done copying them down.
- Overall great teacher and made the material comprehensible.
- I would recommend the professor to anyone who needs this course as a requirement.
- Its algebra simplified, and it fills a core.
- Nice professor that works with you and answers questions when you have them and help you when you need it.
