Hi Ben,

Today the Research team shared the student satisfaction feedback from session one. I've copied and pasted the results from your classes; the reason I only have GLIF.NOO to share is because there weren't sufficient results from your morning section for Research to consider them anonymized.

Bargening; I liked most if not all the topics we covered.; My favorite topic was the psychology portion of Game Theory.; Nash Equilibrium; Payoff Polygons; Prisoner's dilemma; Saddle Points; The Prisoner's Dilemma
Bayes Theorem; flipping a coin; I really liked the first game we played, which was when I first really understood Game Theory.; Learning; Penny Flipping; The Pirate Riddle; The

Presentation; When we got into groups and played a game and analyzed the game and its strategies after

Games Against Nature; I don't like probability, so the math stuff.; I liked most if not all the topics we covered.; mixed strategy games; needing to do the presentation; none; probability; The tree diagrams

I enjoyed all the activities; N-person Games; pirate game; Probably the worksheets at home, since I don't really understand probability well.; Sometimes I found the Straffin homework exercises a little hard and confusing; Voting Methods

I thought that in the beginning of the course, the homework was a little intense, however, I got better at managing my time so it was not as stressful to complete my work in time.; Maybe some more time in class for questions; n/a; not as many straffin excercises; Nothing comes to mind, besides maybe adding a textbook source for when you don't understand; This is more because of COVID-19 and having to do class online but, I felt that I didn't have enough time to work or interact with the instructor individually and always be able to get my questions fully answered or get all the help I needed. Every thing; everything; I really enjoyed the class meetings and thought that they helped me complete and understand the assignments.; Pretty much

WHAT WOULD YOU KEEP SAME**

everything else; the activities ; The material for the course was very interesting and engaging to me and my instructor did a great job teaching the material.; The structure of the course was good, and progressed in a logical manner. I would probably keep the course the same.; the video instruction every hw

I thought that he was very engaging and when I had questions, he responded very quickly.; none; Nope
