Qualitative

1/2/24, 7:50 AM - Anthology

What did you like about this course? -

- It challenged me to become better in this area of work.
- I liked how this course provided me with a general knowledge of algebra.
- It helped me recall basic calculus topics.
- the professor
- I liked that this course was clear, cut, and concise. There was nothing we learned that didn't show up on unit tests. The class was made easy with the effort put in, but it wasn't a total pushover of a class either. I also liked the instructor a lot, he seemed very self-aware that this class was a core or prerequisite for many other classes and his self-awareness made the class entertaining.
- Everything was explained clearly and there was no confusion about anything we did learn
- I liked how the homework website gave you the opportunity to try again if you messed up a question. I also liked how it gave you the option to 'help you solve' or 'watch a video.'
- I liked the Pearson website that we did homework on.

What could be improved about this course? -

- The homework assignments sometimes covered topics we didn't go over in class
- The only thing I could think of that may improve this course is having recorded lectures. The notes on Blackboard after each lesson are helpful, but I feel like hearing an explanation alongside those notes would allow for a deeper student understanding of the content.
- n/a
- I believe that the lectures in class should prepare students for what will be on the homework in "My Math Lab"
- I think if it could become more independent to a point and not just copying down all the problems the teacher walks us through.

Please explain your answer to the question above. Why would you recommend or not recommend this course to others? -

- It is challenging but still fairly easy just have to pay attention.
- I would recommend this course to others because it provides a general understanding of algebra.
- he was a very good professor
- It is an easy math class, especially for those with experience in the subject.
- I would definitely recommend this class to others. Easy class but not a pushover class, it successfully reviewed many concepts taught in high school without making them too boring. I also personally enjoyed the night timeslot of this class, it allowed me to be awake enough to actually process the math and make sense of it when compared to the many high school morning math classes I had.
- This course made math the easiest to grasp and I believe choosing this class would be the best option if you are required to take 115
- Although, I personally struggle with mathematics, this course challenged me, and helped me to develop study tools for future classes.
